Policies

Chair Selection: The chairs are selected each year by a committee composed by the prior chairs and the board of the main sponsor (INSTICC). The candidates are first of all the prior chairs, who are usually rotating in a regular basis, after a few years on the same position. When the prior chairs rotate and a position is open, the list of candidates is composed by the highest h-index members of the program committee, prior keynote speakers and frequent authors, who are familiar with the conference processes. Occasionally, are added to the list of candidates other internationally distinguished researchers, who are proposed by colleagues belonging to the initial list of candidates. Criteria to be actually invited to become conference chair or program chair include the level of expertise and recognition, based on Google Scholar h-index or Scopus h-index, combined with the coverage of the conference topics, based on the candidate list of publications in these indexes as well as in dblp, R&D projects participation, and also, to a lesser extent, gender and international representativeness.

Additional Data

Google Scholar Data

Sub-category url:

https://scholar.google.com.au/citations?view_op=top_venues&hl=en&vq=eng_computervisionpatternrecognition Position in sub-category: 20+

h5 index of 20th item in category: 44

No Google Scholar h5 index available for this conference

Potential reason for no h5 index: There is no Google Scholar h-5 index available for this conference because Google Scholar is ranking its individual tracks, which is wrong. Three of VISIGRAPP tracks have an h-5 index, namely: International Conference on Computer Vision Theory and Applications has an h-5 index of 22, International Conference on Information Visualization Theory and Applications has an h-5 index of 22, International Conference on Information Visualization Theory and Applications has an h-5 index of 29.

Relationship to similar conferences

Partial ordering of similar conferences in the area, with argument as to where the current venue fits and why:

VISIGRAPP can be compared to these four other CORE B conferences: Advanced Concepts for Intelligent Vision Systems (ACIVS), Annual Symposium on Combinatorial Pattern Matching (CPM), International Conference on Computer Analysis of Images and Patterns (CAIP), and Pacific-Rim Symposium on Image and Video Technology (PSIVT). One of the VISIGRAPP tracks have an higher h-5 index than all of them - they have an h-5 index of 13, and the Pacific Rim Symposium has an h-5 index of 11. Moreover, VISIGRAPP has a smaller acceptance rate, certainly below 50%, and its' steering committee is similar to the compared conferences regarding their notoriety in their field of study and Google Scholar h-index. It is also important to note that the Pacific Rim Symposium is an event for researchers of that specific area, while the other conferences, including VISIGRAPP, have an international scope.

Other Information

Other Relvant Info

Other relevant information: The existence of the individual tracks of the VISIGRAPP conference in Google Scholar is wrong, since they're all published in the VISIGRAPP Proceedings. This can be verified by the fact that all volumes of each VISIGRAPP Proceedings have the same ISSN and ISBN. We are aware of this problem, and we are working on fixing it for the future.

In addition, it is important to note that VISIGRAPP has had top international researchers as Keynote Speakers in the last three years, such as Dieter Schmalstieg, from Graz University of Technology, Austria, Federico Tombari, from Google and Technical University of Munich (TUM), Germany, Alexandru Telea, from Utrecht University, Netherlands, and Liang Zheng, from Australian National University, Australia.
