

**Submission Data for 2020-2021 CORE conference Ranking process  
IEEE International Symposium on Wearable Computers**

Kristof Van Laerhoven, Thad Starner, Michael Beigl, Thomas Ploetz, Kai Kunze, Lucy Dunne, Katia Vega

**Conference Details**

**Conference**

Title: IEEE International Symposium on Wearable Computers  
Acronym : ISWC  
Rank: A\*

**Requested Rank**

Rank: A\*

**Recent Years**

**Proceedings Publishing Style**

Proceedings Publishing: self-contained

Link to most recent proceedings: <https://dl.acm.org/doi/proceedings/10.1145/3410531>

Further details: Novel, rigorous research contributions of smaller scope than full papers are published in a separate proceedings (see above URL to recent proceedings) published by ACM. These are peer-reviewed by a TPC of experts with the same rigour and process (physical PC meeting, shepherding of papers), for 25 years now since ISWC 1997.

From 2020 onwards, we explicitly invite full papers published in ACM IMWUT ( <https://dl.acm.org/journal/imwut>) for presentation, at the conference jointly held with UbiComp ( <http://ubicomp.org> ), with which ISWC is collocated since 2013.

DBLP url: <https://dblp.uni-trier.de/pid/98/4399.html>

## Policies

Chair Selection: The conference rotates every three years between Asia/Pacific, Europe/Africa, and the Americas. Bids are put in for each conference for the region for that year, and the steering committees vote on which bid to accept. At least one of the General Chairs should be from the host region as part of the bid. For the ISWC Program Chairs, we seek to have an academic and an industry chair. Chairs should be well established in the field.

**Other Information**

**Comparator Comparison**

**Comparator**

IEEE International Conference on Pervasive Computing and Communications

Explanation as to why conference is superior to comparator:  
 h5 index of PERCOM (26) is of a similar h5 level of ISWC (24)

Comparing PERCOM on aminer vs ISWC on Google Scholar shows that ISWC has many more citations of the top 10 cited papers than PERCOM. While AMiner shows less citations than Scholar in general, it does not account for the dramatic difference Sum of top 10 most cited papers: 1535 PERCOM 7632 ISWC

**Comparator**

IEEE/ACM International Symposium on Mixed and Augmented Reality

Explanation as to why conference is superior to comparator:  
 h5 index of ISMAR is 20, whereas h5 of ISWC is 24

ISWC has over 122, 000 paper downloads: ISMAR 112, 000

Although ISMAR was established as an offshoot of ISWC (first as IWAR, then ISAR, then ISMAR), the top people in wearable computing publish much more regularly in ISWC than ISMAR.

**Other Relvant Info**

Other relevant information: Please note that DBLP has mislabeled the ISWC proceedings for certain years. The WPP tool has consequently assigned several ISWC publications to UbiComp in the statistics.

Example: Thomas Ploetz has contributed 8 ISWC papers, but only 1 appears in DBLP: <https://dblp.org/pid/98/4399.html> -ç These are missing for 2019: "Handling annotation uncertainty in human activity recognition", "On the role of features in human activity recognition", "Multi-target affect detection in the wild: an exploratory study" These are labeled correctly in other sites such as Google Scholar or ACM DL.

Aminer does not list ISWC or ISMAR in their conferences. Note that there may be confusion between the International Semantic Web Conference (ISWC), which is listed in aminer, and the International Symposium on Wearable Computers (ISWC) that we are describing here.

Top cited ISWC papers according to Google Scholar (
