

**Submission Data for 2020-2021 CORE conference Ranking process
International European Conference on Parallel and Distributed Computing (was International Conference on Parallel Processing)**

Fernando Silva, Luc BougÃ

Conference Details

Conference

Title: International European Conference on Parallel and Distributed Computing (was International Conference on Parallel Processing)
Acronym : EuroPar
Rank: A

Requested Rank

Rank: A

Recent Years

Proceedings Publishing Style

Proceedings Publishing: series

Link to most recent proceedings: <https://link.springer.com/conference/europar>

Further details: Since 1995, the proceedings of the Euro-Par Conference have been published by Springer in its LNCS series and more recently in the ARCoSS (Advanced Research in Computing and Software Science) distinguished subseries. Conference proceedings only includes full papers selected by the conference PC members organized by topics. PC members associated with the reviewing of one topic cannot submit to that topic. Each paper receives 4 reviews on average. Acceptance rate is normally around 25%.

The workshops co-located with Euro-Par are also published with Springer, but as a separate post-conference volume. The reviewing for the workshops is organized separately even though also rigorous.

A doctoral symposium is organized together with workshops aimed for early PhD students, and selected extended abstracts are published in the workshops proceedings.

Policies

Chair Selection: Euro-Par is organized in topic tracks, normally between 10 and 12. In each edition, the general chair, with one year in advance, proposes to the steering committee 2 names for each track. A local chair, someone normally from his country that is knowledgeable on the topic and also trustable on the work, and a Global chair. The global chair must be someone well known in the area of the topic and preferably aware of Euro-Par procedures, that is, should have served before as a member in one topic PC. A balance on gender as well as country representation is also an aspect that is verified by the steering committee and usually enforced as much as possible. Once these are validated and have been accepted, these two chairs together with the general chair invite other members for each track subject to the following constraints. The same person cannot belong to more than one track PC. Country representation and gender balance should also be a concern, as well as international visibility of the members being invited. When inviting a member, the reviewing rules for Euro-Par are sent at same time so that acceptance of the invitation is also acceptance of the rules. These rules enforce that members cannot submit papers to the topics/tracks they are reviewing. On easychair, the PC members of a track only see the papers of their track.

No Policies.

Dates and citation counts are estimated and are determined automatically by a computer program.

No Google Scholar h5 index available for this conference

Potential reason for no h5 index: There is no specific category for parallel and distributed computing, or high performance computing. On the other hand, the top-20 mixes journals and conferences and very few conferences are listed in the subcategory of "computing systems", the one that seemed to represent more closely the area of Euro-Par.

Where People Publish

Top (Senior) Program Committee Members

These graphs show numbers of people publishing in multiple years. Each column shows number of people in that many or more years. The number publishing in a specific number of years can be seen by the difference with respect to the previous column.

Reference item: \ 2. European Conference on Parallel Processing (Euro-Par)

 This conference was published at 17 times by 8 of 16 experts in the last 5 years.

The experts that publish at this conference are: Paolo Trunfio(2), Jess Carretero 0001(1), Bertil Schmidt(2), Pedro C. Diniz(1), Hatem Ltaief(5), Thomas Fahringer(4), Arnaud Legrand(1), Gabriel Antoniu(1)

In 2015, there were 4 publications by 3 experts: Hatem Ltaief, Bertil Schmidt, Thomas Fahringer
 In 2016, there were 6 publications by 5 experts: Bertil Schmidt, Jess Carretero 0001, Pedro C. Diniz, Hatem Ltaief, Thomas Fahringer
 In 2017, there were 3 publications by 3 experts: Paolo Trunfio, Arnaud Legrand, Gabriel Antoniu
 In 2018, there were 2 publications by 1 experts: Hatem Ltaief
 In 2019, there were 2 publications by 2 experts: Paolo Trunfio, Thomas Fahringer

8 out of the 16 experts published at this conference in 1 or more years
 4 out of the 16 experts published at this conference in 2 or more years
 2 out of the 16 experts published at this conference in 3 or more years

Top People Report

Method of selection: The 20 names were collected on editorial boards of scientific journals such as IEEE TPDS, Concurrency and Computation, IJHPCA, JPDC, TOPC, as well as names of well of highly credible researchers in the areas of HPC/Parallel and Distributed Computing suggested by members of the Steering Committee of Euro-Par.

Other Information

Comparator Comparison

Comparator

International Conference on Parallel Architecture and Compilation Techniques

Explanation as to why conference is superior to comparator:

- Euro-Par has a more strict procedure towards acceptance to the main conference. It only accepts full papers, thus has a lower acceptance rate. This is not the case with PACT that accepts posters together with full papers, raising the acceptance towards 45% of the submitted papers.
- Euro-Par is viewed as a stable, rigorous and reputable conference, in many aspects due to the close guidance of the steering committee on how each edition is organized and run. Furthermore, its topic-based scientific organization enables more specialized distributed scientific leadership to a larger panel of people coming from a variety of institutions and cultures.

Link to comparator report:

http://portal.core.edu.au/core/media/conference_submission_2020/Data_Comparator_for_1625_872.pdf

Comparator

IEEE International Conference on Cluster Computing

Explanation as to why conference is superior to comparator:

- Euro-Par has a more strict procedure towards acceptance to the main conference. It only accepts full papers, thus has a lower acceptance rate. This is not the case with CLUSTER that accepts short papers and posters together with full papers, which in some

years raises the acceptance above 35% of the submitted papers. - Euro-Par is viewed as a stable, rigorous and reputable conference, in many aspects due to the close guidance of the steering committee on how each edition is organized and run. Furthermore, its topic-based scientific organization enables more specialized distributed scientific leadership to a larger panel of people coming from a variety of institutions and cultures.
