

2021 4603 Committee

Zi Huang (University of Queensland)

Thanh-Toan Do (Monash University)

Dong Xu (University of Sydney)

Jianfei Cai (Monash University)

Min Xu (University of Technology Sydney)

Xian-sheng Hua (Alibaba DAMO Academy)

Tatsuya Harada (University of Tokyo)

The submission requested a reranking from B to A, which was considered to be justified.

The PC of this conference is very strong compared to other A ranked conferences, and most of its SPC members actively publish in the venue.

This conference has been with low acceptance rate (30%) for many years, which is similar to its comparator WACV.

Although the conference has fewer published papers than its comparators, this can be partly explained by the fact that the conference focuses on multimedia area rather than computer vision.

The committee recognised that the quality of the conference has been improved in recent years and determined that most of the data indicators (a fairly high google h5 of 30, average PC chair h-index of 40) of the conference were clear indicative of an A conference and agreed to rerank it as A.

Committee members Dong Xu and Min Xu had a CoI. They only provided objective information about the conference but stood aside from the decision.
