This conference is considered as a comparator with the rank of B. The committee determined that this can be justified as all data were clearly indicative of a B conference.

The h5 index and the averaged h-index of PC chairs are at the median of the listed comparators. Meanwhile, the WPP report shows that established researchers regularly publish in this venue, where 18/19 experts published at the conference in one or more years in the past 5 years.

The committee agreed to remain it at B.
