This is a comparator and retaining the rank of A is considered justified. It has a decent Google Scholar h5-index (31), which is higher than other A-conferences (CAISE, ECIR, ICDT, PAKDD). PC chairs also have strong track records (e.g., with average h-index ~38 in the previous year). 12 out of 29 (S)PC members have published in the conference in 2+ years. The conference generally receives around 180 submissions and its acceptance rate is ~28%. The PC median h-index of 9 is on the lower side for an A conference, showing only 15% (30/201) as established researchers. Due to limited data being available from a comparator submission only, and considering all indicators, the ranking is retained at A
