

4606 2021 Committee

Weifa Liang (Australian National University) CHAIR
Albert Zomaya (The University of Sydney)
Wen Hu (University of NSW)
Winston Seah (Victoria University of Wellington, New Zealand)
Lorenzo Alvisi (Cornell, USA)
Yuanyuan Yang (Stony Brook University, USA)

The data for this conference was provided as retaining it at rank A.

This is a medium sized conference (30-60 papers) with an acceptance rate below 30% in the past three years. The median scopus h-index for PC members is 11, with 16/84 established PCs, which is below compared with the other PC profiles of A conferences. Its Google h5 index is 20 which is in the lower end of an A conference, and its CCF rank is C, indicating it is not a strong A conference. No citation and h-index25 data are available for this conference. Considering such important data are missing, it is difficult to justify its current status at rank A, the committee suggested that it is appropriate to down grade the conference to rank B.

Having received a new submission from the conference steering committee's submissions, it is noted that the conference runs many years already, and it promotes parallel computing in EU and European counties, and solid training venue for young researchers and PhD students. However, the quality of the conference does not secure it to maintain at A status. The committee agreed the conference to be rank at B.
