

2021 4611 Committee

Geoff Webb (Monash University)

Chang Xu (The University of Sydney)

Ben Rubinstein (The University of Melbourne)

Ling Chen (University of Technology Sydney)

Peter Flach (University of Bristol)

A submission was made to rank ICLR with the requested rank of A*. The committee's assessment was based on the data provided together with data obtained from the proceedings, Google Scholar and Scopus.

Factors indicating high quality and prestige include

- * the Google Scholar h5-index of 203;
- * the proportion (41%) of established researchers in the senior program committee;
- * senior PC members publish in A* venues NeurIPS and ICML;
- * the reputation of the conference.

Factors less supportive include

- * the acceptance rate 39% in 2017, but noting that it is dropping rapidly (26% in 2020) and that the acceptance rate for oral presentations is always less than 10%

The committee was unanimous in assessing ICLR should be ranked Exceptional (A*).
