

2021 4611 Committee

Geoff Webb (Monash University)

Chang Xu (The University of Sydney)

Ben Rubinstein (The University of Melbourne)

Ling Chen (University of Technology Sydney)

Peter Flach (University of Bristol)

NeurIPS was reviewed because it was provided as a comparator conference for IJCNN. Hence the review used the data submitted by IJCNN together with data obtained from the proceedings, Google Scholar and Scopus. The Google Scholar h5-index of 198, the high proportion (approximately 70%) of established researchers in the senior program committee, and the reputation of the conference all indicated a rank of A*.

This was supported by its China Computer Federation rank of A.

The committee was unanimous in assessing that NeurIPS should retain its current rank of Exceptional (A*).
