Further details: The IEEE International Joint Conference on Biometrics (IJCB) is the premier international forum for research in biometrics and related technologies. It combines two major biometrics conferences (permanently, since 2020), the IEEE Biometrics Theory, Applications, and Systems (BTAS) Conference and the International Conference on Biometrics (ICB), and is made possible through a special agreement between the IEEE Biometrics Council and the IAPR TC-4.  
The DBLP query in Part A did not retrieve all papers of the conference. The 2021 (72 papers) and 2022 (75 papers) editions could not be retrieved automatically, but they are indexed by DBLP and available at IEEE Explore: <https://dblp.org/db/conf/icb/ijcb2021.html> <https://dblp.org/db/conf/icb/ijcb2022.html> The IJCB main page of DBLP has an incorrect link for the 2022 edition (correction pending) with a missing letter. This may be causing an issue.

### Policies

Chair Selection: The conference organizers prepare a bid, which includes brief bio's of the general and program chairs. Bidding information is publicly announced via IEEE Biometrics Council channels and social media. IJCB Advisory Committee evaluates the bids, and if necessary, recommends changes (typically, in form of a request for additions to address a need for gender balance, geographical balance, or lack of organization experience) to the committee.

Prof. Fierrez has received best papers awards at AVBPA, ICB, IJCB, ICPR, ICPRS, and Pattern Recognition Letters. He is also recipient of a number of world-class research distinctions, including: EBF European Biometric Industry Award 2006, EURASIP Best PhD Award 2012, Medal in the Young Researcher Awards 2015 by the Spanish Royal Academy of Engineering, and the Miguel Catalan Award to the Best Researcher under 40 in the Community of Madrid in the general area of Science and Technology. In 2017 he has been also awarded the IAPR Young Biometrics Investigator Award, given to a single researcher worldwide every two years under the age of 40, whose research work has had a major impact in biometrics.

Justification: (source: [https://iapr.org/fellowsandawards/awards\\_petrou.php](https://iapr.org/fellowsandawards/awards_petrou.php)) Yunhong Wang received the 2022 IAPR Maria Petrou Prize for contributions to pattern recognition and biometrics, service to the IAPR community and being a role model as leading scientist. This biennial prize is awarded to a living woman scientist/engineer who has made substantial contributions to the field of Pattern Recognition (or a closely related field), and whose past contributions, current research activity and future potential may be regarded as a model to both aspiring and established researchers.

(source: <https://research.com/u/yunhong-wang>) Yunhong Wang is a Professor at the School of Computer Science and Engineering, Beihang University. She has been awarded IEEE Fellow for her contributions to iris recognition and face recognition, and has been awarded IAPR Fellow for her contributions to pattern recognition and biometrics.

### Relationship to similar conferences

Partial ordering of similar conferences in the area, with argument as to where the current venue fits and why:

IEEE FG: Also a flagship conference of IEEE Biometrics Council, and jointly sponsored by IEEE Computer Society. FG has more affective computing and psychology involvement, and less focus on biometrics. Acceptance rates are similar

ICPR: Flagship conference of IAPR, has a strong biometrics component, but many other tracks in pattern recognition, thus, much broader. Acceptance rates are similar.

For both FG and ICPR, while acceptance rates are similar, the biometrics community follows IJCB much more closely. The conference also has a link to IEEE Biometrics Council's main journal, IEEE Transactions on Biometrics, Behavior and Identity Science, and often a "Highlights of IJCB" special issue is edited in this journal.

CVPR, ICCV, ECCV, BMVC, WACV: The leading conferences in computer vision and pattern recognition are much larger than IJCB, and contain computer vision based biometrics (face recognition, body-based biometrics) among many other computer vision applications.

These conferences have lower acceptance rates and more visibility, as a result of the huge growth in computer vision field, attracting thousands of participants.

### Other Information

#### Other Relevant Info

Other relevant information: The Google h5 is indicated for BTAS, one of the two conferences that were joined together for IJCB. IJCB has completely replaced ICB and BTAS in 2020; prior to that, it was organized several times, but ICB and BTAS were also organized individually in other years. DBLP lists past ICB's under IJCB now, but BTAS needs to be checked separately.

Note that "Biometrics" can be placed topic-wise neither under "Computer Vision", nor under "Privacy", and is not well addressed by Google Scholar's categories.
