4603 Committee:
Helen Huang (Chair), Jianfei Cai, Tatsuya Harada, Xian-Sheng Hua, Nicu Sebe, Qianru Sun, Chang Xu

Decision:
Conference to be ranked as C

Justification:
The current CORE C International Conference on Machine Vision (ICMV) conference focuses mainly on computer vision and multimedia. The request to rank the conference is to CORE B. Citation statistics of publications and the range of PC members are well below the current CORE B conferences.
The conference has a high acceptance rate, exceeding 50%, and the Program Committee Chair has a lower h-index. The overall Google h5 index for the papers at ICMV is 17. It is worth noting that this conference is well below the average C conference.

Reviewers all agree that ICMV should be ranked CORE C.
