Decision

Conference to be ranked/tagged as A.

Justification

AIED had a rank of A and requested to keep this rank. Metrics indicate that AIED is slightly below A/A* conferences for author strength, citation centiles are closer to B conferences. The conference has an h5-index of 23. The conference receives a good number of submissions (around 200, and acceptance rates are not too high. The data shows that established researchers publish at this conference. Well established researchers with high h-indexes attend regularly and area leaders publish in the venue. Despite some aspects suggesting a rank of B, it was agreed that maintaining a rank of A was reasonable.
