

4606 Committee

David Eyers (chair), William Fornaciari, Xiao Liu, Jan Rellermeyer, Abusayeed Saifullah

Decision

Conference to be ranked as C

Justification

The citation statistics closely match the average of CORE rank C conferences. The h-index of the strongest author is consistently below the average performance of CORE rank C conferences. These indicators do not point toward a ranking higher than C.

The PC of recent events shows a good proportion of established researchers, but also a proportion that appear relatively junior. Numerous internationally recognised participants have published at the conference multiple times in recent editions. Even so, these additional aspects of context do not strongly support a shift from a C ranking.

The committee was unanimous in recommending a C ranking.
