Conflicts of Interest

None

Decision

Conference to be ranked C

Justification

The conference has requested to be added to the DB at rank A.

Citations are quite strong, and the conference seems competitive based only on acceptance rates. However the strength of authors publishing here is quite weak. The PC has a large number of very junior members and those who are more senior are not really engaged in publishing here. Neither are they publishing in top venues primarily. The conference is a moderate size with an h5 of 21. Despite some strengths, at this stage it is considered that C is the most appropriate rank. It may well gain a higher rank in future years.
