Conference to be ranked as B

The conference has a good number of submissions, at 250, 118 and 253, in the past three years. The acceptance rate is relatively high compared to A*/A and most B venues, at 40%, 42% and 37%, in the past three years. Its H5 index is 34, placing it 16th in the sub-category of Data Mining & Analysis. The Program Chairs have H-index varying from 24 to 41 in the last three years, lower than typical for an A*/A venue. The General Chair is the same every year. PC information is not provided. The citation per paper centiles align more with B conferences and demonstrate a significant gap compared to the A*/A conferences, similarly for the author H-index centiles. Information about strong participants of the conference is not provided. This conference was published at 32 times by 8 of 17 selected area leaders in the last 5 years. The H-index of some selected area leaders are low (e.g., below 30).
