

October 2017

Committee:

Lin Padgham (Chair, RMIT)

Franck Cassez (Macquarie University)

Tony Wirth (University of Melbourne)

Robert van Glabbeek (Data61)

Serge Gaspers (University of NSW)

Joachim Gudmundsson (University of Sydney)

This conference has only been going for 2 years and requested A* ranking. Most people felt it was probably an A, but there is really not sufficient data as yet to make any evidence based judgment. There is no data available on h-index, or impact factor, and with only 2 years it is not possible to assess whether it is supported by regular publishing from a substantial number of strong researchers. The committee decided it should be added with tag new in the ranking field, and re-assessed if data is submitted, when there has been an opportunity to accrue more data.
