FOIS was provided as a comparator, although the community subsequently provided additional information. Overall, the committee felt that FOIS was more appropriately ranked "B". It noted that the conference was relatively small (and biennial), that chairs varied in seniority and strength, that there was no Google h5-index, and that the programme committee was on the weak side. A corrected WPP received from the community showed that the PC was actively publishing in FOIS. The committee also noted the existence of other conferences that overlapped in topic (e.g. ISWC, KR, ESWC) and that were highly ranked, and considered stronger. Overall, and taking into account the additional information, the committee recommended that FOIS be reranked to "B".
