ICARCV was provided as a comparator (it was also on the "must submit" list, but did not submit), The comparator submission was not sufficiently detailed (e.g. stating there was no Google h5, when it exists and was h5=13). The conference is quite clearly not an A (e.g. acceptance rate well over 50%), but the committee did not have sufficient information to make an informed assessment, so additional information was sought. This additional information (especially acceptance rate, which for 2020 was over 70% - 224 out of 307 = 73%) enabled the committee to reach a consensus to recommend a "C" ranking.
