WI was provided as a "B" comparator. The committee saw it as clearly a solid "B". Indicators included (very) strong chairs, and h5=18 (the h5=20 in the comparator report appears to be wrong). The programme committee was somewhat weak. The provided WPP used WI-IAT 2020. A corrected WPP (below) was created, which showed that the stronger members of the PC were mostly not actively published in WI.

One committee member noted a mild COI, having published there a few times.

NOTE: This assessment was for WI, not for IAT - in some years the two events are held jointly.

Corrected WPP:
