This conference is considered as a comparator with a rank of B. The committee determined that this was easily justified as all data indicators were clearly indicative of a B conference. Specifically, although the h5 index of the conference is lower than the median of the comparators, the h-index of its PC is higher than the average. According to the data provided by WPP, experts in its area published at this conference regularly.

Thus, the committee agreed to remain its rank at B.
