This conference is considered as a comparator with the rank of B. The committee determined that this was easily justified as all data indicators were clearly indicative of a B conference.

Particularly, the main strengths of the conference are reflected by relatively high google h5 index(30) and established researchers regularly publishing in this venue.

Though the size of the conference is relatively small, this can be partly explained by the fact that it focuses on the multimedia retrieval rather than computer vision.

The committee agreed to remain it at B.
