Joseph Liu (Monash University)
Catuscia Palamidessi (Inria and ecole Polytechnique of Paris)

Members in CoI

Haya Shulman (Fraunhofer Institute for Secure Information Technology SIT)

Provided as a comparator, Maintain A* Ranking

EuroCrypt has been provided as a comparator.

This conference is a common publishing venue for world-renowned cryptography experts.

It is one of the three main conferences of the International Association for Cryptologic Research (IACR), the other two being CRYPTO and AsiaCrypt. Among these three, it is the one with the highest h-5 index (61, by comparison, CRYPTO is 52 and AsiaCrypt is 42).

The acceptance rates are reasonably low (23, 23, and 25 in the last three years), and the WPP of the Top Program Committee Members places this conference Second after CRYPTO. Furthermore, it is ranked A in Aminer CCF. The ASIACRYPT submission shows this is a venue of choice for top crypto people. The committee is in general agreement that EuroCrypt remains one of the flagship conferences for Cryptography research and recommends unanimously that it maintains its A* ranking.
