The conference has an h5 of only 8, which is low for a B conference, this can be partly explained by the fact that it is a small conference (40 papers/year) in a relatively small research community. However its PC is good with 11/55 members considered established researchers. It has over 150 submissions, the acceptance rate is low. This conference was published 12 times by 3 of 9 experts in the last 5 years. In 2019, papers from professor Quan Z. Sheng (h-index 49, 12700 citations) and Xuyun Zhang (h-index 37) were published by the conference. According to data provided senior people regularly publish and attend. The impact trend is going up as the submissions from 118 in 2017 increased to 170 in 2019.
