Uwe Roehm

DCC is a pretty focused conference, focus on data compression only. In the past three years, the General Chairs are the same people: Michael W. Marcellin and James A. Storer. The Program Chairs are also the same people: Ali Bilgin and Joan Serra-Sagrasta. So far, no submission data is available, only data is the PC's publication records, which is good. All the 11 senior people published at least once in the venue while most of them published in the venue more than 2 times in the last of 5 years. The other venues that they also published across different rankings, from C to A\*. The conference was created in 1991, the WPP and the repeat publications are good. The h5-index for this conference: 20. PC Chair Avg H-index is 24.5, PC H-index is 19. The 25th centile on citation table is 12.8. There is no information in Aminer. Given both the general and program chairs are the same researchers in the recent years, there is no preface for conference proceedings without much information of the acceptance and the submissions. The information provided is justified as a B conference.
