Uwe Roehm

Conference is currently ranked A. The report does not have enough data. However, the committee explored the internet to get some basic data. The acceptance rate is 18.9% in 2019 (<https://academic.oup.com/bioinformatics/article/35/14/i1/5529263>). The proceedings is published in Bioinformatics journal which is, according to Google Scholar, the top journal in "Bioinformatics and Computational Biology Journal" category (h5-index: 125) https://scholar.google.com/citations?view_op=top_venues&hl=en&vq=bio_bioinformatics. Looking at the conference website (<https://www.iscb.org/ismb2020>), it appears to be a large conference (with over 500 scheduled talks). The conference chairs are also well-established researchers. E.g., in 2020, the chairs were David Sankoff (h-index: 76, citations: >29,000), Francis Ouellette (h-index: 34, citations: >18,000) and Shoshana Wodak (h-index: 72, citations: >20,000). However as it is not possible to obtain much of the data used for ranking conferences, it will be tagged as journal-published, in line with CORE policy for most conferences published in journals.
