The conference has a specialised focus with number of accepted ranging between 30 and 40, which is quite small and indicates a narrow field. The H5-index is 34. The PC chairs have a high h-index (average 37); for PC members the h-index averages around 15 with a good balance of junior and senior researchers. PC members regularly publish in the conference (31 out of 39 PC members published at least once, 22 in at least two years, and 14 in at least three years). For the PC members, the conference is their most popular venue, but they also publish in A/A\*-ranked conferences like ICDE and SIGMOD. One committee member (Cheema) identified a conflict with this conference and was not part of the decision.
