Requesting unranked to C

This conference is rather unusual in that its proceedings and past conference pages are password protected. While details of reviewing processes could not be found, it appears to have academic reviewing of full papers, and to be a legitimate academic event.

The PC has over 150 members, of which 35 can be considered established researchers. However only 5 of these have published in the conference in the last 5 years, which does call into question their level of genuine engagement with the venue.

As it does appear to meet basic academic standards it can be ranked as a C level event.
