4606 2021 Committee

Weifa Liang (Australian National University) CHAIR
Albert Zomaya (The University of Sydney)
Wen Hu (University of NSW)
Winston Seah (Victoria University of Wellington, New Zealand)
Lorenzo Alvisi (Cornell, USA)
Yuanyuan Yang (Stony Brook University, USA)

his conference was identified as requiring review and a submission
was made to retain the rank of A.

This is a medium sized conference (25-33 papers). the original
submission shows an acceptance rate of 26%-36% in the past three
years. However the acceptance rate for 2019 is incorrect and is
actually 58% rather than 26% as indicated in the message from the 2019
Chairs.
(https://conferences.computer.org/escience/2019/pdfs/eScience2019-5TouQQ0xrJE4hnylaL88mN/D0a0vlr8C34bOniXvXaD5

The median scopus h-index for PC members is 15, with 46/113
established PCs. There is no Google h5 index available for this
conference. Also, this conference did not appear in other major
conference ranking list such as CCF and Aminer. Analysis of citation
data from Elsevier shows that citations are extremely low compared to
other conferences in this FoR code. The committee considers that
strong CS papers in this area would be published in high quality Cloud
Computing venues in preference to this venue and therefore considers
it appropriate to rank it as B rather than A. A reconsideration
request was received, but the provision of additional comparators did
not alter the veiw of the committee that this is clearly no longer an
A conference, based on all the available information, and it will be
reranked to B.
